

Aleksandr Zaretsky

Python Backend / Fullstack Developer

Tbilisi, Georgia | +995 598 32 06 34 | alexandrv85@gmail.com | github.com/AIZarPy | t.me/AleksandrZaretsky

SUMMARY

Turning business requirements into working products.

Experience designing, developing and deploying commercial systems, integrations and automation tools. Use AI-assisted workflows to accelerate development and problem solving.

SKILLS

Python, FastAPI, PostgreSQL, SQLAlchemy, Pydantic

React, TypeScript

Docker, Linux, Nginx, Git

REST API, JWT, Alembic, pytest

EXPERIENCE

ALFATEAM

Fullstack Developer | Nov 2025 – Present

- Independently delivered 3 commercial products end-to-end, owning architecture, backend development, admin panels, integrations, deployment and support.
- Built and maintained a backend platform supporting clients, bodyguards, orders, chats and scheduling workflows across 4 user roles, 198 API endpoints, 159 schemas and 30+ ORM models.
- Proposed and implemented address normalization through DaData for CDEK integration, reducing operating costs by approximately 6,000 RUB per month.
- Implemented centralized monitoring and logging, reducing production issue investigation time to approximately 5 minutes and eliminating the need for direct server access.

PAVEPO

Intern Backend Developer | Apr 2025 – Oct 2025

- Developed backend services and automation tools using Python and FastAPI.
- Integrated a Telegram bot with an existing FastAPI backend and implemented administrative workflows for users, companies and orders.
- Delivered 5+ automation tools and data collection utilities, including parsers and standalone Windows applications.

MIXBS

Supervisor | Oct 2022 – Oct 2025

- Managed a team of up to 30 operators.
- Automated 5+ recurring reports using Google Apps Script and Python, reducing reporting time from 4 hours per week to 20 minutes.
